Re: Market intent for MTLS

Dear Karel

This letter serves to confirm the market intent and need for the MTLS.

We currently have an intersection that was installed in Johannesburg for approvals by the local roads agency, which has subsequently been approved by them for installation on roads in JHB. We have a similar set up in Dubai through Siemens which is awaiting approval there. We also have a similar set up in Germany through a company called Signalbau-Huber. They have expressed huge interest in the MTLS we are in discussions with them for a license agreement.

In addition to the above we have letters of intent from the following companies:

Traffic Tech – Australia

Traffic Solutions LTD – Ireland

Lochwynd – UK and Scotland

Cellmec (Siemens) – GCC States

TSA – South Africa, Zambia, Botswana, Mozambique

RA Systems – Democratic Republic of Congo

Signalbau-Huber – Germany and EU

Kind Regards

Barry Geer
